

About KASK

KASK is an Italian company born in 2004, which specializes in developing, designing and manufacturing helmets of the highest quality. Innovative and attractive, the entire KASK collection is a perfect balance between technological excellence, functionality, safety, comfort and its exclusive 'Made in Italy' design.

KASK cycling helmets are used by all kinds of riders across all disciplines – road, mountain bike, triathlon, track, cyclo-cross, commuting and urban – and KASK is proud of its sponsorship of, and development in conjunction with, many leading teams and athletes.

On the road, these teams and athletes include seven-time Tour de France winning Team INEOS, professional women's team Ceratizit-WNT Pro Cycling, and pro triathletes Andy Potts, Matt Hanson, Giulio Molinari and Michelle Vesterby. In MTB, KASK sponsors the Stan's – Pivot Pro Team and Centurion Vaude Team Squads, as well as Swiss off-road star Lukas Flückiger, and is a proud partner of the Italian Cycling Federation.

Details

Aero Control

Incredibly aerodynamic and top performing shell, tested in the wind-tunnel and able to provide a really impressive CX rate. Any position the head will assume the outflow of the air will be perfectly in line with the helmet.

3D Dry Padding

The tridimensional 3D DRY padding utilizes a multi-layer open cell construction process: high technology for the best comfort and performance.

Eco-Leather Chinstrap

Chin pad with eco-leather chinstrap The allergenic and washable chinstrap is extremely comfortable and helps to avoid irritation of the skin

High Breathability

Because the inner padding fiber speeds up the evaporation process of perspiration, slow down the formation of humidity on the skin and keeps the temperature constant.

Magnetic Visor - Patent Pending

The innovative magnetic visor is patented by KASK and integrated to the helmet thanks to a five magnets' system. The total adherence of the visor to the helmet allows a continuous air flow and a great aerodynamic.

Coolmax® Fiber

Removable and washable inner padding in Coolmax® material

High Visibility Stickers

High visibility stickers for maximum safety even in poor visibility conditions

Soft Wind

The inner padding in Soft Wind is highly breathable, antibacterial and guarantees a perfect temperature control.

In-Moulding Technology

The MIT Technology, applied to KASK cycling helmets, guarantees a higher safety and a complete protection thanks to the polycarbonate layer that covers the shell on the top, on the base ring and on the back.

Sanitized® Treated Fabric

Inner padding fabric treated with antibacterial and antimicrobial Sanitized® process.

HyVent

Structure and design of the shell implement the air flow and break up the exchangeable heat.

Removable Cheek Pads

Emergency removable cheek pads to improve security in case of crash.

Octo Fit

Rubberised Micro Dial adjuster provides improved finger grip. Floating cradle contact points combine internal gel pads for optimum comfort. These supports are designed to oscillate freely through 180° allowing a perfect fit on any shaped head. The Skeletal Brackets of the cradle have been designed and refined to provide the best fit and support whilst being as light as possible

Up & Down Fit System

The up'n'down adjustment system gives the most precise and comfortable fitting of any helmet thanks to its unique double pivot design. This allows the back of the head to be cradled by the straps, which are then easily tightened to the correct tension by a central ratchet wheel. This fit system combined with a very breathable, non-slip, gel internal liner ensures top performance for the user.

Antistatic

Because of its conductivity, the inner padding fiber absorbs and disperses electric charges accumulated from the environment or during physical exercise.

Full Carbon Shell

Low weight fully carbon shell provides maximum protection at very low weight.

Inner Frame

The innovative inner strengthening frame offers a greater mechanical strength and a better compactness. In case of shock it prevents the helmet from breaking into many pieces, allowing greater safety for every rider.

Double D-Ring Chin Strap

Two metal D-rings on one side of the fastener and a simple strap on the other, provide the ideal combination for a micro-adjustable secure fit for supreme comfort and safety

Helmet Bag

Adjustable Visor

The visors can be adjusted in different positions for optimum visibility.
